High Resolution Photo Printing

How can you determine whether an image file is high enough resolution to use in your book? That's a question I get asked all the time! Images should be at least 300 ppi (pixels per inch) at the size they'll be printed at— and that's where most people need help.

Is your image high enough resolution for printing?

A high resolution image for printing is almost always 300 DPI and larger. So, what is 300 DPI? 300 DPI means "dots per inch" as in: the printer is going to spit out 300 little dots of ink for every inch of your photograph. So your image file should contain the same number of pixels per inch that ...
